### Summary

Full Stack Software Developer with practical experience designing and delivering scalable web and mobile applications using Laravel, Spring Boot, React, Flutter, and JavaFX. Strong expertise in backend API development, database optimization, and building reliable production systems for transportation, education, and business operations.

Graduated with Honors (GPA 3.74), ranking in the Top 10% of the class. Experienced in collaborating within agile teams, leading feature implementation, and improving system performance through efficient architecture and optimized queries. Passionate about developing high-quality software solutions that solve real-world problems and support digital transformation.

### Professional Experience

Software Developer — Hawi Software Solution
Adama, Ethiopia | Mar 2025 – Present

- Developed full-stack applications using Laravel, Spring Boot, and Flutter for enterprise clients.
- Enhanced the Transport Management System by improving route scheduling and data handling workflows, supporting a **40% increase in operational efficiency**.
- Built key modules for the Ride & Delivery System, including automated fare calculation and driver–client communication, reducing manual dispatch tasks by **30%**.
- Optimized backend endpoints and SQL queries, resulting in **20–35% faster response times** across multiple deployed applications.
- Demonstrated team leadership when coordinating feature implementation with designers, testers, and junior developers during sprint cycles.
- Prepared documentation and contributed to Docker-based deployment setups for production environments.

### Intern Developer (Academic & Internship Projects)

*Jun 2023 – Feb 2025*

- Developed a **Citizen Registration** desktop system using JavaFX + MySQL with optimized data validation and efficient queries.
- Built a **Flutter-based mobile app** for Robera Printing Company, reducing manual order tracking by **50%**.
- Improved backend logic, UI flow, and query performance for **Harambee E-Student**, used by over 300 daily users.
- Led task coordination, UI planning, and integration during a four-member team capstone project.

### Education

Bachelor of Science in Computer Science
Unity University, Ethiopia
*Jun 2021 – Feb 2025 | GPA: 3.74 (Honors, Top 10% of Class)*
**Academic Achievements:** Honors Graduate, Top 10% of Class
**Relevant Coursework:** Database Systems, Software Engineering, Object-Oriented Programming, Mobile Development

## PROJECTS

**Transport Management System**
Contributed to the development of dashboards, access control, and reporting tools for managing vehicles and routes. Took initiative in coordinating backend feature implementation within the development team**,** helping standardize scheduling workflows and reduce manual routing errors.

**Ride & Delivery System**
Built using Laravel and Flutter, implementing driver tracking, automated fare calculation, real-time updates, and secure authentication. Supported coordination between backend and mobile development tasks**,** ensuring smooth integration between system components used for daily service operations.

**Harambee E-Student System**
Improved backend logic and database queries for an academic platform with **300+ daily active users**, enabling smoother access to course materials and student services.

**Inventory Management System**
Developed a React-based inventory management web application for tracking products, monitoring stock levels, and managing business records. Led the design of the user interface structure and workflow logic, improving usability for product management and reporting.

**Citizen Registration System**
Designed and developed a JavaFX + MySQL desktop system for citizen identity registration and data management. Guided the system architecture and database structure**,** ensuring efficient record storage and fast retrieval through optimized queries.

**Robera Printing App**
Flutter app enabling users to submit and track print orders. Helped reduce order-processing delays and improved communication between clients and staff.

## SKILLS

**Programming:** Java, PHP, Dart, C++, TypeScript
**Frameworks & Tools:** Spring Boot, Laravel, Flutter, JavaFX, React (TypeScript), Docker, Git
**Databases:** MySQL, SQL Server, MongoDB
**Technical Areas:** REST API Design, Authentication Systems, MVC Structure, Database Optimization
**Soft Skills:** Team Leadership, Task Coordination, Analytical Thinking, Technical Documentation
**Languages:** Amharic (Native), English (Proficient)

## ADDITIONAL CERTIFICATIONS & ACTIVITIES

- **Red Cross Volunteer Certificate** — community service and emergency support training
- Volunteer contributor to student tech workshops and coding discussions
- **Professional Development**
  **OpenLearn – The Open University (UK)**
  Completed multiple professional courses in:
  - Cybersecurity and Network Security
  - Computing Fundamentals and Coding
  - Quantum Computing Fundamentals
  - Leadership and Professional Collaboration
  - Business and Human Resource Management
  - Communication and Presentation Skills
